Enhancing performance of the health facilities

Partner: Joint Medical Store (JMS)

Country: Uganda

Website: [Joint Medical Store – Health Solutions | Transforming Lives \(jms.co.ug\)](https://jms.co.ug)

Duration: Dec'23-Dec'25

Activity

Treatment and Value Chain

Disease area(s) in focus

Diabetes Cardio

Other stakeholders:

Ministry of Health, Uganda

Project Overview:

Health Systems Strengthening in PNFP hospitals:

Enhance performance of the health facilities towards their missions and to the health system functions and goals, so as to create a positive impact on the communities they serve and promote sustainability for the health facilities

Achieved Reach

- 25 Supply Chain Partners trained
- 98% of people trained in the facility on a topic for which they are responsible → 675 people in across the 25 facilities

Outcomes Acheived:

Improved accuracy of Stock Management/ Accountability

- 88.9% of MOH inventory tools used and adopted/ number of recommended MOH tools (target 80%)
- 91% of inventory stock on hand that matches stock records for selected products: (target 90%)
- 90% of Hospitals that meet WHO benchmark for 2% expiries: (target 95%- continuous follow up of expiries management will be provided as part of JMS supply chain services)
- 84% of selected products with zero days out of stock :(target 95% - Further improvement in stock availability requires additional resources to enable purchase of the required quantities and reduced rationing during procurement)

-
