Pharmacy capacity building to address NCDs

Partner: Pilltech
Country: Cambodia
Website: [PillTech](#)
Duration: Jul '2024 – Jan '2025

Activity

HCP Empowerment

Disease areas of focus

Diabetes Cardio

Other Stakeholders

- Pharmacy Council of Cambodia, MOh

Project Overview

The aim is to elevate the competence of pharmacy professionals to effectively promote risk reduction and to promote diagnosis and treatment adherence for clients at risk of hypertension, diabetes, and CVD.

Achieved Reach

240 pharmacists completed accredited training in basic pharmacy management and operations and NCD care (hypertension, diabetes, and cardiovascular risk), including screening, counselling, adherence support, and referral.

Outcomes Achieved

Improved accessibility of NCD Services and support to patients

Pharmacists initiated routine NCD screening in their pharmacies.

Pharmacist confidence increased in providing clinical advice, not just dispensing
