

We chase the *miracles* of science to improve people’s lives.

Strengthening response to NCDs

Partner: Acasus
Country: Afghanistan
Website: [Acasus](#)
Duration: Dec’24 – Sep’26

Activity:

Patient Care
HCP Empowerment

Disease areas of focus

Cardio. Diabetes

Other stakeholders:

MOH

Project Overview

Increasing the number of trained health workers by carrying out capacity building of Basic Health Center (BHC) staff in two high footfall districts of Afghanistan. Improving access to better quality NCD-care to communities by facilitating, upskilling and enabling Community Health Workers (CHWs) and their supervisors

Outcomes Expected

Communities are more aware of NCD risks, prevention and have access to “early” diagnosis

NCD Services and support are easily accessible to patients

HCPs have improved knowledge, confidence and tools to support Patient

Targeted Reach

500,000 people screened

150 HCPs to receive training
