

We chase the *miracles* of science to improve people's lives.

NCD Platform

Partner: KASHA

Country: Rwanda

Website: kasha.rw

Activity:

Patient Care
Treatment and Value Chain

Disease focus:

Diabetes
Cardio

Others Stakeholders:

- Rwanda Biomedical Center
- MOH Rwanda

Project Overview:

The project will develop an NCD platform to support patients with NCDs in Rwanda. The three main objectives of the NCD platform include:

Increase awareness of diabetes and hypertension through training of agent and pharmacy network and community outreach

Increase access to testing and treatment by providing options and pathways for patients to be tested and put on treatment through mobile clinics and provider referrals while providing access to affordable, quality diabetes and/ or hypertension medicines to patients through omnichannel distribution

Improve long-term adherence (both compliance and persistence) to diabetes and/ or hypertension medicines through agent networks and health services, including loss-to-follow-up management

Targeted Reach

- 52500 people engaged in Diabetes/CV awareness messages
- 5000 People screened through mobile clinics
- 50 trained Community Agents
- 90 Pharmacists trained

Outcomes Expected:

*Medicines are consistently **available***

*Communities are more **aware** of NCD risks, prevention and have access to "**early**" diagnosis*

*NCD Services and support are **easily accessible** to patients*

*Patients have improved **knowledge and confidence** to self - manage their condition*
