Duration Jan'26 – Mar'28

Project Overview

Integrated hypertension and diabetes care in Somalia

Targeted reach:

- Capacity strengthening for 6 train the trainers (ToTs) and 90 health workers to support HTN and diabetes management
- Capacity building for 45 PHC facilities for opportunistic screening, linkage, treatment, and management for HTN and diabetes
- Training and mentorship for 300 FHWs/ CHWs on HTN and diabetes management
- 125,000 screened for HTN and diabetes with linkage to care
- 200,000 people reached with awareness messaging and information to support demand for screening and treatment adherence.

Outcomes expected

Communities are more aware of NCD risks, prevention and have access to "early" diagnosis

NCD Services and support are easily accessible to patients

HCPs have improved knowledge, confidence and tools to support Patients
