

We chase the *miracles* of science to improve people's lives.

PharmAccess

NCD Care Bundles

Partner: PharmAccess

Country: Zanzibar

Website: [PharmAccess | Home](#)

Duration: Dec'22 – Sep'26

Activity

Patient Care

Disease area(s) in focus

Diabetes Cardio

Other Stakeholders:

MoH

Project Overview:

The Project is an integrated patient- centered model of care aiming at improving diagnosis and disease management for patients with cardio-metabolic diseases through a care bundle consisting of access to patient groups meetings, digital self-management support, remote care and medications.

The project aims to achieve the following 4 components:

1. Introduce remote care monitoring
2. Higher % controlled blood pressure and blood glucose levels among patients using the package
3. NCD Care bundle ready for adoption and scaling by partners
4. Institutionalize remote care monitoring within the Ministry of Health systems and structures to ensure long-term sustainability and ownership.

Targeted Reach

1660 patients (Diabetes/CV) linked to care

50 CHWs trained

Outcomes Expected:

NCD Services and support are easily accessible to patients

Patients have improved knowledge and confidence to self-manage their condition

HCPs have improved knowledge, confidence and tools to support Patients
