

We chase the *miracles* of science to improve people's lives.

## NCD Care Bundles

*Partner:* PharmAccess

*Country:* Zanzibar

*Website:* [PharmAccess | Home](#)

*Duration:* Dec'22 – Mar'25

*Activity*

Patient Care

*Disease area(s) in focus*

Diabetes Cardio

### *Project Overview:*

The Project is an integrated patient-centered model of care aiming at improving diagnosis and disease management for patients with cardio-metabolic diseases through a care bundle consisting of access to patient groups meetings, digital self-management support, remote care and medications.

The project aims to achieve the following 4 components:

1. Introduce remote care monitoring
2. Digital diabetes and hypertension care packages available at acceptable cost levels to patients
3. Higher % controlled blood pressure and blood glucose levels among patients using the package
4. NCD Care bundle ready for adoption and scaling by partners

### **Targeted Reach**

600 patients enrolled in a sponsored NCD care program (Diabetes/CV) - treated & followed

### *Outcomes Expected:*

NCD Services and support are easily accessible to patients

Patients have improved knowledge and confidence to self-manage their condition
