Duration: Oct'24-Dec'26

Activity

HCP Empowerment

Disease area(s) in focus

Oncology

Other stakeholders:

- MD Anderson Cancer Center, Texas, US

Project Overview:

Oncology Specialist HCP Training Programme

Targeted Reach

- 2 gynaecological oncology specialists trained 2025-27
- Strengthen support to 10 additional oncology-related HCPs through international mentorship

Outcomes Expected

HCPs have improved knowledge, confidence and tools to support Patient

- Train two Gynecologic Oncology fellows over two years through the existing IGCS Global Oncology Fellowship Program
- Enhance the training and education of 10 clinicians in related specialties (Radiation Oncology, Medical Oncology, Pathology, Radiology and others) through mentorship from international experts and participation in existing IGCS programs to improve multidisciplinary cancer care in Mozambique.
- Hold monthly virtual multidisciplinary tumor boards with participation from international experts using the Project ECHO platform.
- Hold two multidisciplinary cancer care symposia (one per year) in Mozambique.
